CAREER OBJECTIVE

Java Full Stack Developer with hands-on experience in developing secure, scalable, and database-driven web applications using **Java 21**, **JEE**, **Servlets**, **JSP**, **JDBC**, **Hibernate**, **MySQL**, and **Apache Tomcat**. Strong understanding of software architecture, object-oriented design, authentication mechanisms, and RESTful services. Seeking a Software Engineer role where I can contribute to high-quality products, solve real-world challenges, and continuously enhance my technical expertise while delivering innovative software solutions.

SKILLS

Programming Languages: Java, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript, React (Basic)

Backend: Java, JEE, Servlets, JSP, JDBC, Hibernate

Database: MySQL

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), Exception Handling, Collections Framework, MVC Architecture, DAO Pattern,

Tools & Technologies: Apache Tomcat, Git, GitHub, Eclipse

PROJECTS

Food Delivery Web Application | Click Chow

Java 21, Servlets, JSP, JDBC, MySQL, Apache Tomcat, JavaScript, DAO Pattern, BCrypt (jBCrypt)

- Developed a **multi-role food delivery web application** using **Java 21**, **Servlets**, **JSP**, **Apache Tomcat**, and the **MVC architecture**, supporting **Customer**, **Admin**, and **Delivery** portals with role-specific functionalities.
- Designed a modular **Data Access Layer** using **JDBC**, **PreparedStatement**, and the **DAO pattern** to perform secure and efficient CRUD operations on a **MySQL** database.
- Implemented secure authentication and authorization using **Role-Based Access Control (RBAC)**, **HttpSession** management, and **BCrypt (jBCrypt)** password hashing to protect user credentials and application access.
- Built a **stateful shopping cart** and complete checkout workflow with dynamic price calculation, order processing, and transactional order creation for seamless purchasing.
- Developed **JSON-based REST-style endpoints** for real-time delivery order polling and created an **Admin Dashboard** to manage restaurants, menus, and customer orders efficiently.

EXPERIENCE

TAP Academy

Full Stack Developer Intern

Feb 2026 – Present

Bengaluru, India

- Building end-to-end web applications using **Java**, **JEE**, **Servlets**, **JSP**, **JDBC**, **Hibernate**, **MySQL**, and **Apache Tomcat**, following MVC architecture and object-oriented programming principles.
- Developing responsive user interfaces with **HTML**, **CSS**, **JavaScript**, while implementing database-driven functionalities using **JDBC**, **SQL**, and the DAO design pattern.
- Applying secure authentication, session management, debugging, testing, and clean coding practices to develop scalable and maintainable enterprise web applications.

ACHIEVEMENTS

Awarded **Certificate of Merit** for participation in **Dhruva**, a national-level technical symposium organized by **NIT Trichy (Currents'23)**, demonstrating active engagement in technical learning.

EDUCATION

M.A.M. School of Engineering, Trichy

Bachelor of Technology in Artificial Intelligence & Data Science

2022 – 2026

CGPA: 7.3/10
